Professional Summary

Information Systems / IT Operations Manager with 15+ years of experience delivering enterprise applications, IT service delivery, and digital transformation initiatives in the UAE. Currently supporting 13,000+ users across business and operations, with strong expertise in IT Service Management (ITSM), vendor & SLA management, and workflow automation. Proven track record in leading CAFM, CRM, ERP, Helpdesk, and analytics platforms that improve operational efficiency, governance, and service reliability.

Strong hands-on background in enterprise application architecture, system integration, reporting, and automation platforms.

Core Competencies

- IT Operations & Service Delivery (ITSM)
- Incident / Problem / Change Management
- Business Applications (CAFM / CRM / ERP)
- Vendor & SLA Management
- Digital Transformation & Automation
- Power Platform (Power Automate, Power Apps)
- Reporting & Analytics (Power BI, SSRS)
- Project & Program Management (PMP)
- Stakeholder & Executive Engagement

Professional Experience

Emrill Services - Dubai, United Arab Emirates
Information Systems Manager (2021 – Present)

- Lead enterprise information systems and IT operations supporting 13,000+ users across business and operational teams.
- Define and execute IS strategy aligned with organizational goals, driving digital transformation and operational efficiency.
- Govern IT Service Management (ITSM) processes including Incident, Problem, Change, and Service Request Management.
- Manage vendor relationships and service delivery performance, ensuring SLA compliance and effective escalations.
- Spearheaded delivery of an award-recognized multi-module CAFM platform, digitizing FM workflows and improving operational visibility.
- Implemented an ITIL-aligned ICT Helpdesk system, enabling structured ticketing, asset management, and service governance.
- Delivered workflow automation and process efficiency initiatives using digital forms and low-code platforms.
- Led development of a unified enterprise mobile application integrating ERP, CRM, and ICT Helpdesk with SSO.
- Partner with business and operations stakeholders to prioritize initiatives, manage UAT, and govern production releases.
- Drive continuous improvement through automation, reporting, and standardization across IS services.

Emrill Services LLC – Dubai, UAE
Senior Information Systems Analyst / Team Lead | 2018 – 2020

- Conducted in-depth analysis of information systems, identifying improvement areas.
- Guided management on technology strategies, developing scalable applications.
- Developed and implemented technical solutions using ASP.NET, SQL Server, and SharePoint.
- Managed a development team, ensuring high-quality deliverables and adherence to deadlines.
- Provided user training and technical support, enhancing adoption rates.
- Architected and built enterprise applications to streamline operations and boost efficiency.
- Directed development teams, ensuring projects were completed on time and aligned with project objectives.
- Implemented robust security measures in application development, preventing security vulnerabilities.

Al-Futtaim Carillion – Dubai, UAE

Software Analyst Programmer / Team Lead | 2016 – 2018

- Designed and delivered enterprise applications to improve operational efficiency and governance.
- Led programming teams to deliver projects on time and within scope.
- Ensured secure application development and mitigation of common vulnerabilities.

Al-Futtaim Carillion – Dubai, UAE

Web Developer (Jan 2012 – Feb 2013)

- Developed and managed web applications and SharePoint portals, ensuring timely project completion and adherence to best practices.
- Followed team leader guidelines, wrote clean code, and selected appropriate technologies for each project.
- Identified process inefficiencies and raised risks to ensure deadlines were met and project goals achieved.

IBM India – Bengaluru, India

Software Engineer (Jan 2010 – Dec 2012)

- Developed applications based on business requirements and supported production systems.
- Assisted users with reporting, documentation, and system enhancements.

Key Enterprise initiatives

Enterprise CAFM Platform
Led delivery of a multi-module CAFM platform integrated with ERP and third-party systems, enabling end-to-end FM operations digitization and recognized with multiple industry awards across MENA.

CRM & CAFM Transformation (B2C Services)
Implemented CRM-CAFM solutions supporting B2C service delivery, improving scheduling, service tracking, and customer experience.

ITIL-based ICT Helpdesk Platform
Designed and implemented an ITIL-aligned helpdesk covering Incident, Problem, Change, Asset, and Project Management, strengthening IT service governance.

Unified Enterprise Mobile Application
Delivered a single mobile platform integrating ERP, CRM, and ICT Helpdesk with SSO, improving accessibility and workforce productivity.

Digital Forms & Workflow Automation Program
Automated manual approval workflows using low-code platforms with KPI tracking, auditability, and governance.

Enterprise BI & Analytics Platform
Delivered 50+ operational and management dashboards enabling data-driven decision-making across departments.

TECHNOLOGY OVERVIEW

Enterprise Platforms & Systems

- CAFM Platforms (multi-module enterprise implementations)
- CRM & Customer Service Platforms
- ERP-integrated Business Applications
- ITSM / Helpdesk Platforms (ITIL-aligned)
- SharePoint (Portals, Workflows, Document Management)

Digital Transformation & Automation

- Microsoft Power Platform (Power Apps, Power Automate)
- Enterprise Digital Forms & Workflow Automation
- System Integration & API-based connectivity
- Single Sign-On (SSO) & Identity integration

Data, Reporting & Analytics

- Power BI (enterprise dashboards & KPIs)
- SSRS (operational & management reporting)
- SQL Server (data modelling, reporting support)

Application Architecture (Oversight & Design)

- .NET ecosystem (web & service-based enterprise applications)
- Flutter & react apps.
- Multi-tier application architecture
- Secure application design & governance
- UAT, Release & Production Change Governance

IT Operations & Governance Tooling

- ITIL-aligned Incident / Problem / Change Management
- Asset & Configuration Management
- Vendor-managed support models
- SLA, KPI & service performance tracking

Platforms: CAFM, CRM, ERP, SharePoint, Power Platform
Automation & Low-Code: Power Automate, Power Apps
Analytics: Power BI, SSRS
Development (overview): .NET ecosystem, React, Flutter, SQL Server, PostgreSQL, MySQL, Joget
Methodologies: ITIL-aligned ITSM, SDLC, Agile delivery
